Dear Hiring Manager,

I am writing to apply for the **.NET Developer** position at **Konrad**. I have hands-on experience building modern, production-grade web applications using **C# and .NET**, and I am excited about the opportunity to contribute to a team that values innovation, quality, and continuous learning.

In my professional experience, I have developed and maintained **web applications and APIs**, focusing on writing clean, maintainable, and performant code. I have a strong understanding of **core web principles** including HTTP, routing, security, and data persistence, and I am comfortable working with relational databases to design efficient, scalable solutions. I regularly participate in **code reviews, testing, and debugging** to ensure high-quality software delivery.

I enjoy working in collaborative environments where clear communication and shared ownership are essential. Beyond implementation, I actively explore new technologies and tools, and I value improving development workflows and engineering best practices. I also have exposure to **frontend technologies such as React** and experience working within **cloud-based environments**, which helps me understand applications end to end.

Konrad's culture of creativity, technical excellence, and commitment to building impactful digital products strongly resonates with me. I would welcome the opportunity to grow as part of your highly skilled development team while contributing meaningfully to client-facing solutions.

Thank you for your time and consideration. I look forward to the opportunity to discuss how my skills and enthusiasm align with Konrad's goals.

Kind regards,

Harshit Patel
